

Mobile Guide

# Upload to Box

**On Your Computer**

**On Your Android**

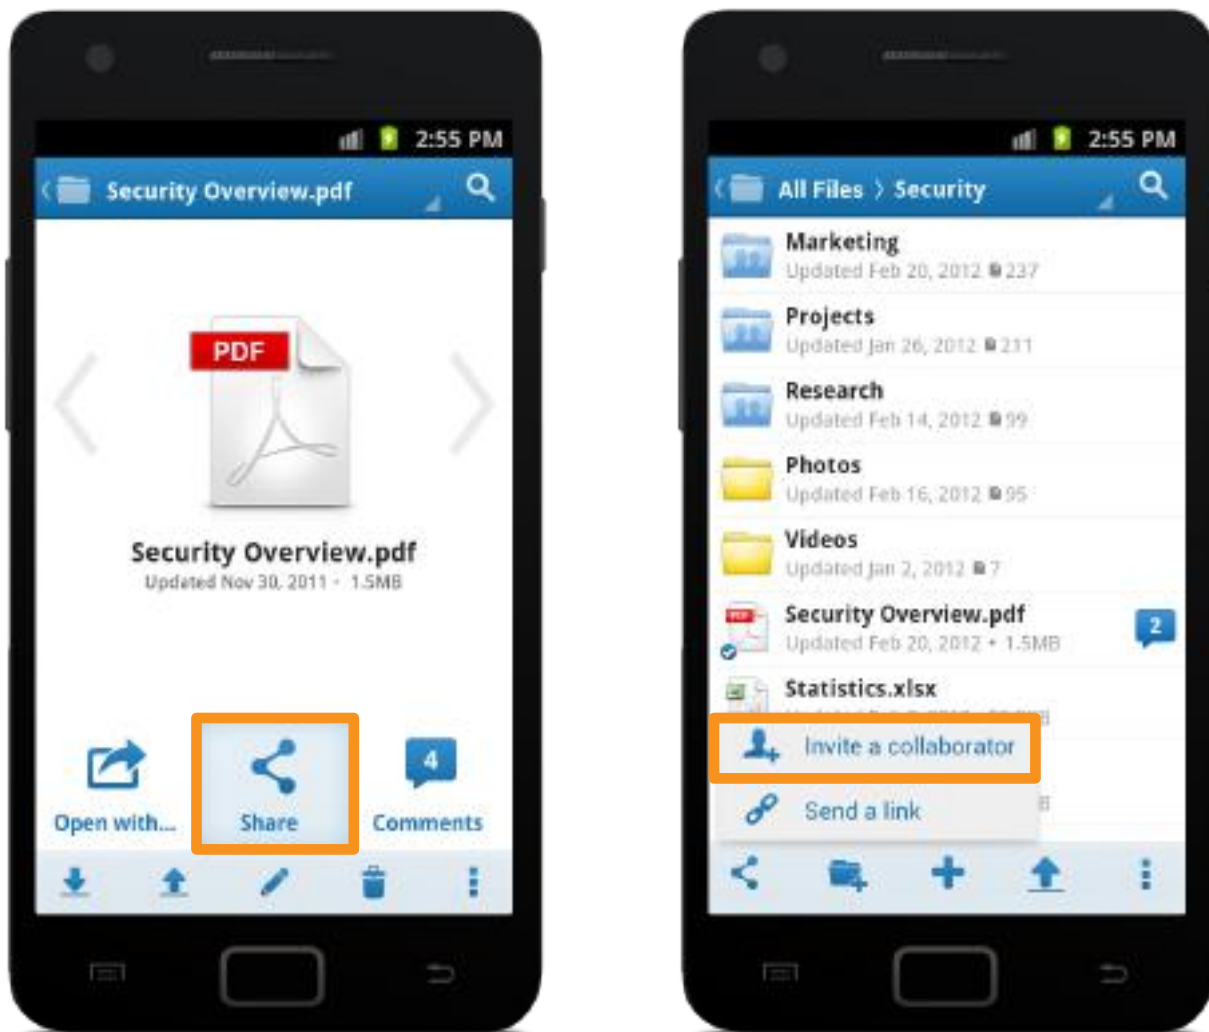

- . Put all your content on Box: any type of file, from any device, or upload files, photos and videos directly to Box from your Android device.
- . Organize content into folders for quick access.
- . Invite co-workers or friends to your folders, too, whether working on a project or simply sharing files.

# Create, Open and Edit Files

- Conveniently browse through and view all your content from anywhere, on any device – including Android phones and tablets.
- Easily create and edit files on-the-go through Box's integration with other apps installed on your Android device, like Documents to Go and QuickOffice.

# Share with Colleagues

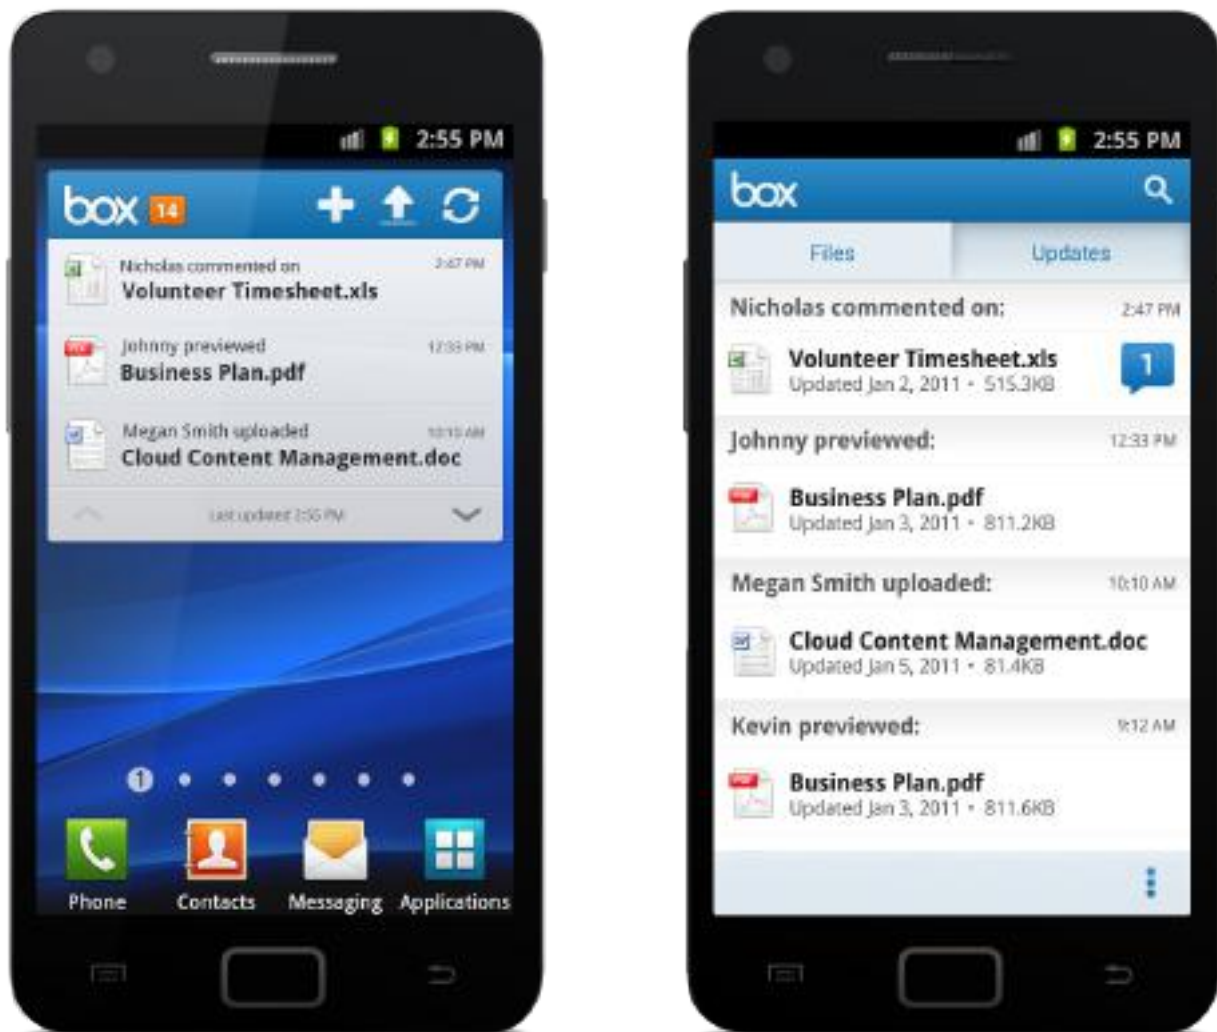

- . Get a contract to your client before leaving the meeting, not after.
- . Send a file, folder, picture or video in only a few clicks just by emailing a link.
- . Invite colleagues to a shared folder without waiting until you're at the office.

# Save Files for Offline Access

- . Access all your important documents and presentations from your Android phone or tablet, even while offline.
- . Save files to your device for offline access, then open wherever you are for uninterrupted access.

# Stay Up-to-Date

- With the Updates tab and email notifications, know when teammates edit or view a file - or even when a new one is added.
- Add feedback by leaving a comment.
- See updates without opening the app by adding the Box homescreen widget.

## **Simple, Secure Sharing From Anywhere**

For nearly 7 million individuals, 100,000 businesses, and 82% of the FORTUNE 500, Box provides simple, secure content sharing from anywhere, on any device – including your Android phone or tablet. Documents, spreadsheets, images, you name it. With Box, you take it all with you wherever you go.
